## Product description

### DESIGN AND PERFORMANCE

A real cellar, the cigar cellar allows the enthusiast to keep his most beautiful cigars in complete safety (lock). The glass door, treated against UV, sublimes your cigars and creates a real setting.

### TO THE NEAREST DEGREE

In order to restore all its aromas, the cigar needs a hygrometry between 65 and 75%, and a temperature between 16 and 20°C. The cigar does not like variations in temperature or humidity, so care must be taken to keep them in a stable and regulated environment. For added security, the cellar control panel permanently displays the set humidity level.

### OPTIMIZED STORAGE

Preserve and showcase up to 260 cigars on its 2 wooden drawers. These accessories are included with the cellar and optimize storage. The total capacity depends on the size of your cigars and if you store them in their original packaging.

#### HYGROMETER

The hygrometer allows to monitor the exact humidity level inside the cellar

#### LOCK

Secure your wine collection in all time

#### LED LIGHT

LED lighting highlights the wine without harming it or disturbing its storage

#### WOODEN SHELF

Traditional and aesthetic they absorb vibrations
