

Working under extreme conditions – with the Samsung Galaxy Tab Active3

Hard exterior, impenetrable interior. Designed for all applications where water, dust and bumps are an everyday occurrence. With the compact 8" Galaxy Tab Active3, nothing can diminish your productivity. The tablet was specially developed for harsh working environments and is certified to IP68 and military standards.

Particularly robust design

Things don't always go smoothly at work. This is why the Galaxy Tab Active3 is able to withstand drops from a height of up to 1.5 m in the protective cover provided (1.2 m without the cover). With added protection against water and dust, productivity is guaranteed even under extreme conditions. The Active key on the side is also able to trigger pre-defined actions quickly without using the display.

More power on the move

Thanks to the powerful Exynos processor, supported by 4 GB of RAM and 64 GB of internal storage space, even demanding tasks can be carried out anywhere with the Galaxy Tab Active3. microSD cards with a capacity of up to 1 TB enable easy handling of large amounts of data, while WiFi6 and MIMO technology ensure optimal connection quality even in harsh conditions.

Advanced power supply

The Galaxy Tab Active3 boasts a particularly simple and practical power supply. The powerful 5050 mAh battery is long-lasting and simple to replace. Thanks to Advanced Direct Power, a cable can efficiently supply the tablet with uninterrupted power without the battery being in the device. This protects the battery from overheating, especially in hot environments such as vehicles.

Desktop experience with a monitor

The 8" display is perfect for working on the go. If a monitor or display is available off-site or in the office, all it takes is one cable to transform the Galaxy Tab Active3 into a desktop computer with a large display thanks to Samsung DeX. A mouse or keyboard can also be quickly connected via USB or Bluetooth.

Technical data

Galaxy Tab Active3

Universal features	Display	8.0" WUXGA TFT display, 1920 x 1200 pixel (Glove mode)
	Brightness	480 cd/m ²
	Processor	Lhotse, 2.7 GHz, Octa-core
	Operating system	Android 10, Samsung One UI 2.5
	Memory	4 GB RAM and 64 GB storage (can be expanded up to 1 TB with microSD card)
	Camera	13 MP AF and 5 MP
	Battery	5050 mAh, replaceable battery, direct power without dummy battery
	Interfaces	USB 3.1 type C, headphones: 3.5 mm
	Connectivity	LTE Cat. 13 (600 Mbps/75 Mbps), NFC, 802.11 a/b/g/n/ac/ax 2.4 + 5 GHz, HE80, MIMO, 1024-QAM, DeX Dual Mode
	Security/Protection	Fingerprint sensor, Knox Active Protection
	Certification	MIL-STD-810G, ATEX1/2, IP68 (water and dust resistant)
	Fall protection	Height of up to 1.5 m (with protective cover)
Accessories	Scope of delivery	Anti-shock protective cover, data cable, travel adapter, quick start guide
Dimensions and weight	Weight	430 g (500 g with protective cover)
	Dimensions (W × H × D)	126.7 × 213.8 × 9.9 mm
