Elegant design and Galaxy AI combined

The Galaxy S24 FE is available in four fresh colors. The robust Gorilla Glass Victus+ on the front and rear provides optimum protection and a longer lifespan. The super-bright Dynamic AMOLED 2X 6.7" display is incorporated into a slender aluminum frame to round off the elegant design. The integrated Galaxy AI functions make your life easier and offer a new user experience. Use them to improve your snapshots, summarize texts in the blink of an eye and cross language barriers.

Top-notch Photography

The triple main camera of the Galaxy S24 FE shoots even sharper and more detailed pictures than its predecessors. As in the S24 series, the 50 MP wide-angle camera comes with impressive technology such as multi-frame composition and AI deep learning. The improved selfie camera with dual-pixel technology shoots razor-sharp pictures even in low light conditions and is able to separate subjects from backgrounds. Galaxy AI functions like Photo Assist complete the camera experience. The photo assistant uses generative AI for new editing features such as background fills to complete missing parts of the image, to guarantee unique results.

A powerful complete package

The new powerful processor and 8 GB RAM ensure that switching between apps, editing videos and images, as well as gaming all run smoothly on the Galaxy S24 FE. Thanks to its improved 4700 mAh battery, you can stay connected all day long without having to worry.
