

A is for Awesome

Make the most of the Flagship Experience without compromise: The new Galaxy A17 series is lighter and thinner, yet still offers stability thanks to the robust material and is water and dust resistant to IP54¹. The powerful battery ensures a long operating life so that you can take impressive photos or videos with the powerful camera. The shots really come into their own in intense colors and high resolution on the AMOLED display with Full HD+. With the features of the Galaxy AI², you can easily edit and personalize photos and videos to suit your needs.

Galaxy A17 5G highlights

- 6.7" Super AMOLED Full HD+ display with 90 Hz
- Triple camera (rear): 50 MP main sensor with Auto Focus and optical image stabilizer (OIS)
- 5000 mAh battery and 25 W fast charging function
- 4 GB RAM + 128 GB memory
- Water and dust resistance to IP54¹

Awesome design

The Galaxy A17 series impresses with its minimalist design and enhanced stability: The internal display is protected by robust Gorilla Glass Victus. The rear is composed of a polymer that has been reinforced with glass fibers. In addition, the optimized design provides better grip during use. Measuring only 7.5 mm, the new Galaxy A17 series is slimmer than the predecessor model. Videos and games are transformed into an immersive experience on the large, ultra-bright 6.7" Super AMOLED Full HD+ display. The 90 Hz refresh rate guarantees fluid animation and highly responsive scrolling. The Galaxy A17 5G is available in Black, Gray and Blue.

Awesome camera

Say goodbye to blurred videos! With the new optical image stabilizer (OIS) of the 50 MP wide angle camera, even images that were taken with a shaky hand turn out bright and clear. With the 5 MP ultra-wide angle camera and the 2 MP macro camera, you can capture details from different viewing angles and produce creative images. The 13 MP front camera ensures crisp selfies with more light. If the snapshots still don't turn out as you wished, you can delete objects using Galaxy AI features such as Photo Assist or remove unwanted sounds from videos with Audio Eraser.

Awesome performance

The powerful 5000 mAh battery provides greater power for everyday use. Galaxy AI is at your fingertips if you want to do things even more efficiently. And by pressing the side button, you can simply access Google Gemini³ and apps that you would otherwise have to open individually. For example, use voice control to create a shopping list for dinner and enter the date as a reminder. If you need instructions for a recipe, Gemini Live provides the answers. With IP54¹ certification, it offers additional protection against dust and water, so that you do not need to worry about environmental influences.

¹ Protection against dust in harmful quantities and splashes on all sides. Must not be submerged in water or exposed to strong water jets.

² Some AI functions require an Internet connection, a Samsung Account login or a Google account login.

³ Gemini is a brand of Google LLC. Requires an Internet connection and Google account login. Only available for users aged 18 years and above.
